Gentlemen:

This is in response to your letters dated November 1, 1984, and February 1 and April 18, 1985, all of which dealt with Revision 16 of your Fundamental Nuclear Material Control Plan, XN-12. Section 7.1.5 of this plan describes two procedures for verifying shipper's measurements for encapsulated fuel in fuel rods.

We have reviewed your procedures and have determined that their implementation will not adversely affect the common defense and security nor the public health and safety and is otherwise in the public interest. Accordingly, existing License Condition 2.1 is hereby amended, effective immediately, to read as follows:

- 2.1 The licensee shall follow the Fundamental Nuclear Material Control Plan titled: "Nuclear Materials Safeguards Procedures Descriptions for the Fuels Fabrication Plants," XN-12, Revision 7 dated June 1978; as amended according to the table of contents, Revision 14, XN-12 dated February 14, 1984; as amended to include Revision 15 as approved by letter dated March 14, 1985, from M. D. Schuster to Dr. R. Nilson of Exxon; as amended by Revision 16 attached to your letters dated November 1, 1984, and February 1 and April 18, 1985; and as may be amended in accordance with the provisions of 10 CFR 70.32(c).

It has been determined that the attachments to your letters dated November 1, 1984, and February 1 and April 18, 1985, all contain information of a type specified in 10 CFR 2.790(d). Accordingly, pursuant to Section 2.790(d)(1), such information is deemed to be commercial or financial information within the meaning of 10 CFR 9.5(a)(4), and shall be subject to disclosure only in accordance with the provisions of 10 CFR 9.12.

Sincerely,

8508010364 850509
