

Docket No. 50-344

MAY 31 1985

Portland General Electric Company
121 S. W. Salmon Street
Portland, Oregon 97204

Attention: Mr. Bart D. Withers
Vice President Nuclear

Gentlemen:

Subject: NRC Inspection of the Trojan Nuclear Plant

This refers to the inspection conducted by Mr. S. A. Richards and Mr. G. C. Kellund of this office on April 2 - May 13, 1985 of activities authorized by NRC License No. NPF-1, and to the discussion of our findings held by Mr. Richards and Mr. Kellund with Mr. Orser and other members of your staff periodically during the inspection.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

No violations of NRC requirements were identified within the scope of this inspection. However, our review of various operator logs maintained at your facility indicates that the detail of log entries is weak in general. We further understand that your staff had previously reached the same conclusion and has been taking steps to improve the quality of log entries. We encourage you to continue in this effort.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be glad to discuss them with you.

Sincerely,

Original signed by
D. F. Kirsch, Acting Director
Division of Reactor Safety & Projects
