Dear Mr. Hall:

Please find attached five (5) copies of Plate 3 pursuant to telephone conversations with Mr. Ray Gonzales of your staff on November 18. They replace Plate 3 from Rio Algom's March 4, 1992, reclamation submittal entitled "Design of Runoff Control Facilities for Final Reclamation.

These copies correct the contours at the outlet of the channel for the lower tailings impoundment as they inadvertently extend beyond the correct contour line to an additional contour line. Thus, as shown on the old plate, the base elevation of 6645 feet on the inlet side of the channel, inadvertently extends to the 6640 feet contour line on the outlet side of the channel rather than stopping at the 6645 foot contour line. The new plates corrects this discrepancy.

If you have questions regarding this submittal, please contact me at (405) 842-1773.

Sincerely,

Bill Ferdinand
