Three Mile Island Nuclear Station, Unit 2 (TMI-2)  
Operating Licensing No. DPR-73  
Docket No. 50-320  
Proposed TMI-2 POL Additional Submittals

Dear Sir:

The proposed Three Mile Island Unit 2 (TMI-2) Possession Only License (POL) (Reference NRC letter dated February 20, 1992) included a license condition 2.F. entitled "Additional Submittals Prior to Post-Defueling Monitored Storage." The license condition requires GPU Nuclear to submit and implement a site Flood Protection Plan, a site Radiation Protection Plan, an Offsite Dose Calculation Manual (ODCM), a Post-Defueling Monitored Storage (PDMS) Fire Protection Program Evaluation (FPPE), a PDMS Quality Assurance Plan (QAP), and a Radiological Environmental Monitoring Plan (REMP).

The PDMS QAP has been submitted and approved by the NRC (Reference NRC letter Michael T. Masnik, NRR, to Dr. Robert L. Long, "Approval of Post-Defueling Monitored Storage Quality Assurance Plan for TMI-2," dated June 3, 1992). The PDMS QAP will be implemented upon entry into PDMS. Minor revisions to the previously submitted ODCM and FPPE will be necessary prior to entry into PDMS. Proposed changes to those documents will be submitted for NRC review just prior to entry into PDMS and will be implemented upon entry into PDMS.

The site Radiation Protection Plan and the REMP are attached for NRC review; they are currently being implemented at the TMI site with no major changes planned.

Although there is no site Flood Protection Plan, per se, the current Recovery Technical Specifications and the PDMS Safety Analysis Report (SAR) requirements related to floods are incorporated in the attached site Flood Emergency Procedure (EP). The Flood EP is being submitted for information only and will not be considered a license basis document.

Sincerely,

R. L. Long

Director, Corporate Services/TMI-2
