Gentlemen:

Subject: Quality Assurance Program Description Change - Nine Mile Point
Unit 2

Reference: Niagara Mohawk Power Corporation Letter NMP2L-0382 to USNRC
dated April 10, 1985

We have received the above referenced letter which documented a change to the Nine Mile Point Unit 2 Quality Assurance Program. This change was to reference NRC approved Stone and Webster Engineering Corporation (SWEC) Quality Assurance Program as the governing document for safety related activities conducted by SWEC at Unit 2, instead of the Quality Assurance Program Manual (a lower tier document). The Region I staff has reviewed and found this change to be acceptable, as the new reference is more appropriate and it did not reduce commitments of your previously approved Quality Assurance Program.

The effectiveness of your QA Program implementation will continue to be the subject of routine regional inspections.

If you have any questions concerning the above, please contact George Napuda at (215) 337-5314.

Sincerely,
