The Methodist Hospital of Gary, Inc.
ATTN: G. S. Kapoor, M.D.
Director
Radiation Therapy Department
Southlake Campus
8701 Broadway
Merrillville, IN 46410

Gentlemen:

As discussed during a telephone conversation between Patricia Vacherlon and Dr. Kapoor, you may wish to terminate your license covering depleted uranium, used as shielding in your lineator accelerator, and add the uranium to your by-product material license.

This procedure is acceptable to the NRC. Your hospital administrator will have to write a letter requesting the termination of license no. SUC-1229 and ask to have the material added to your by-product material license.

Sincerely,

Patricia Vacherlon
