Gentlemen:

Subject: Inspection Report No. 030-19755/85-01

This refers to the special safety inspection conducted by Mr. C. Rowe of this office on May 9, 1985 of activities authorized by NRC License No. 19-21091-01 and to the discussions of our findings held by Mr. Rowe with Mr. James Friel, Jr. of your staff at the conclusion of the inspection.

The area examined during this inspection was limited to the use of the J. L. Shepherd Mark I Series Irradiator and the status of your compliance with the order modifying your license that was issued on July 3, 1984 by the Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards. Within this area, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Within the scope of this inspection, no violations were observed.

From the discussion of our findings at the conclusion of the inspection, we understand that you will relocate the detector probe for your irradiator room monitor to a position in line with the irradiator door. Further, we understand that this action will be completed prior to May 17, 1985.

If your intent differs from our understanding, please notify this office to that effect in a reply to this letter.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:  
John D. Kinneman
