

NOTICE OF VIOLATION

North Ottawa Community Hospital
Grand Haven, MI

License No. 21-13963-01
Docket No. 030-02168

During an NRC inspection conducted on December 15, 1992, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

Condition 15 of License No. 21-13963-01 requires that licensed material be possessed and used in accordance with statements, representations and procedures contained in an application dated April 26, 1991, and a letter received July 20, 1992.

Item 8.1 of the application requires, in part, that all radiation workers receive annual refresher training in radiation safety.

Contrary to the above, since approximately December 31, 1989, radiation workers on the nuclear medicine staff have not received annual refresher training in radiation safety.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, North Ottawa Community Hospital is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, Region III, 799 Roosevelt Road, Glen Ellyn, Illinois, 60137, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a demand for information may be issued to show cause why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

JAN 05 1993
