Youngstown, OH 44505

License No. 34-05384-01
Docket No. 030-02742

Dear Mr. Barabas:

This refers to the routine safety inspection conducted by Mr. D. R. Gibbons of this office on December 9, 1992, of activities authorized by NRC Byproduct Material License No. 34-05384-01, and to the discussion of our findings with you and selected members of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated April 19 and May 24, 1990, regarding violations found during our March 22, 1990 inspection.

During this inspection, certain of your activities were found to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

The violation is a repeat item. In addition to your response to the Notice, please describe why your proposed corrective action is expected to be more successful in preventing this or similar violations from occurring in the future than the corrective action specified in your April 19 and May 24, 1990 letters.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
