Subject: FOIA APPEAL CONCERNING PALO VERDE INVESTIGATION
(FOIA-83-161)

Dear Ms. Bernabei:

The NRC has completed action on the Government Accountability Project (GAP)'s appeal dated May 13, 1983 concerning a March 29 request under the Freedom of Information Act for all records related to or generated by NRC employees in the investigation of certain allegations at the Palo Verde facility. We regret the delay. As you were informed by Ms. Nordlinger of the NRC Office of the General Counsel on July 8, the Office of Investigations (OI) identified a large number of documents to be reviewed at the same time it was completing its investigation. OI was of the view that when the nearly completed OI work was forwarded, most if not all of the documents, on a list enclosed in a July 19 letter to you, could be released. The OI investigation was extended, in part, as a response to GAP's concerns, and is now complete. Accordingly, the NRC grants your appeal for most OI documents subject to your request but denies your appeal for documents and portions of them as indicated below and for three documents withheld from GAP in the initial response.

With regard to OI documents, one tape and substantial portions of ten other tapes and of twenty-one documents are being withheld under Exemption 7A so as not to interfere with the possible referral of part of the investigation by OI to the Justice Department. 5 U.S.C. 552(b)(7)(A), 10 CFR 9.5(a)(7). Disclosure of such sensitive information might compromise the ability or willingness of the Department to undertake its own further investigation. Moreover, at this point the public interest favors further investigation and not disclosure. The vast majority of the other investigative documents subject to your request are being released. The exceptions are noted as follows.

These records include portions of twenty-one documents from which names and personal identifiers have been deleted and two entire tapes under Exemption 7D, because the source was promised confidentiality. 5 U.S.C. 552(b)(7)(D), 10 CFR 9.5(a)(7). Release of the identities could curtail OI's investigative work by showing that the NRC was unwilling to back its promises. Portions of three documents were withheld to protect names and personal identifiers of persons at Palo Verde alleged to have used controlled substances. In view of the fact that these charges were

not proved, the NRC is withholding this information under Exemption 7(C) as information that, if disclosed, would infringe personal privacy. 5 U.S.C. 552(b)(7)(C), 10 CFR 9.5(a)(7). In a limited number of instances, portions of fourteen documents and one tape have been deleted to prevent the identities of persons alleged to have been overexposed from being disclosed. The information is routinely withheld by the NRC. 5 U.S.C. 552 (b)(6), (7)(C), 10 CFR 9.5(a)(6)(i), (7). Nine documents, part of a contractor employee's personnel file, and one document, a salary chart, are also being withheld in their entirety under Exemptions 6 and 7(C). The disclosure of the above information would tend to embarrass these individuals and subject them to public scrutiny on matters where there is no countervailing public interest.

The applicable exemption(s) is clearly noted in the documents where a deletion was made. Where Exemption 7D is invoked it is because those individuals became witnesses under a promise of confidentiality and their continued involvement in the investigation is important to its satisfactory completion. Where Exemption 7C is invoked, it will be clear from the context that the information was deleted to avoid an invasion of personal privacy through an allegation of wrongdoing, such as use of a controlled substance. Where Exemptions 6 and 7(c), it will be clear that the information either about radiation exposure or personnel history. The documents from which information is deleted to a certain extent may have portions deleted for several reasons and all are listed in the Appendix to this letter, based on the list provided to you on July 19. All OI documents will be released to the Public Document Room the early part of next week. An appropriate Notice of Disclosure will be filed in the docket of GAP's pending lawsuit against NRC on this request.

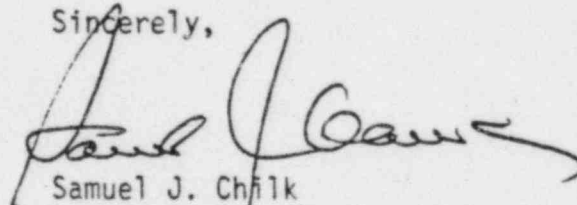

Finally, sixteen documents are being withheld for the time being under Exemption 4 because the owners of the documents have raised concerns that they contain confidential business information. The NRC technical staff and OI are studying the claims under the criteria in 10 CFR 2.790(b). At this time, the NRC believes that a colorable claim has been made and the agency is not able to disclose the documents in full. 5 U.S.C. 552(b)(4), 10 CFR 9.5(a)(4). When the NRC's action is completed, additional documents or portions of them may be released.

With regard to the three documents withheld in the NRC's initial partial response, the Commission believes that the three documents should be withheld under Exemption 5. The documents are a four page paper to the Commission from the Deputy General Counsel and the Director of the Office of Policy Evaluation (OPE), SECY-83-125, and two earlier undated drafts of the paper. In SECY-83-125, OGC and OPE weigh and evaluate the advantages and disadvantages of alternative ways in which the Commission might approach an immediate effectiveness decision for Palo Verde, culminating in a recommendation for Commission action. The two draft documents also contain the above information as well as the changes, deletions, additions, questions, and comments of the drafters and

reviewers that led to the final document. These documents contain the advice, opinions, and recommendations of two of the principal advisors to the Commission on a pending adjudication and disclosure would tend to undermine the frank exchange of views that the Commission must expect from its advisors. The documents are sensitive predecisional communications and will be withheld. 5 U.S.C. 552(b)(5), 10 CFR 9.5(a)(5). However, a portion of a transcript of a March 15 Commission meeting has been found relevant to your request and is being released.

This constitutes final action on your appeal. Notwithstanding your pending lawsuit, I am required by law to inform you of your right to file suit against the NRC with regard to the partial denial of this request. 5 U.S.C. 552(a)(6)(ii). Given the nature of the withholding in this case and the sensitivity of the information to further prosecution and the rights of the individuals involved, the Commission requests GAP to reconsider whether litigation regarding this FOIA request is appropriate.

Sincerely,

Samuel J. Chalk
Secretary for the Commission
