MEMORANDUM FOR: Thomas E. Murley, Director
Office of Nuclear Reactor Regulation

Eric S. Beckjord, Director
Office of Nuclear Regulatory Research

FROM: Edward L. Jordan, Chairman
Committee to Review Generic Requirements

SUBJECT: CRGR REVIEW OF PROPOSED IPE GENERIC LETTER SUPPLEMENT ON
ACCIDENT MANAGEMENT

This is in response to your memorandum, dated November 28, 1989, to me regarding the subject proposed generic letter supplement for transmitting to licensees accident management strategies identified by staff review of existing PRAs. In the proposed supplement, licensees are encouraged to consider accident management strategies identified by the staff and included with the proposed supplement; but there are no actual new requirements for specific licensee actions or reporting promulgated at this time.

After careful review by the CRGR staff, and consideration by the Committee on a negative consent basis, I agree that no formal review by CRGR is required on this item; this is with the understanding that the staff has responded satisfactorily to the enclosed comments that were provided by CRGR member, D. Ross. If there are any further questions regarding this matter, please contact me or Jim Conran of my staff (X29855).
