Docket No. 50-416

MEMORANDUM FOR: Ted Sullivan, Technical Assistant  
Division of Engineering

FROM: Wm. H. Regan, Jr., Chief  
Site Analysis Branch, DE

SUBJECT: GRAND GULF TECHNICAL SPECIFICATIONS

Plant Name: Grand Gulf Nuclear Station

Docket No: 50-416

Licensing Stage: OL - TS

Responsible Branch: LR #2; D. Houston, LPH

SAB Reviewer: A1 Brauner

Requested Completion Date: March 9, 1984

Review Status: Re-examination of Tech Specs - Completed

The Site Analysis Branch has re-examined Section 5.1 of the Grand Gulf Technical Specifications which covers the exclusion area and low population zone. We are in agreement with the technical content shown in Section 5.1 of the Technical Specifications. However, the figures associated with Section 5.1, that were transmitted with your request for re-examination, are illegible and virtually useless. It is assumed that this condition is a result of multiple reproductions and that the figures in the original Technical Specifications are of better quality, or they should be replaced.

Original signed by W. H. Regan, Jr.

Wm. H. Regan, Jr., Chief  
Site Analysis Branch
