Attn: Mr. Duncan White

Dear Mr. White:

The second page of this document is a copy of the shipping bill which covers the return of an Amersham Model 865 camera to Amersham.

During your conversation with my wife, a few days ago, she understood that a Telex copying this shipping document would allow you to cancel Ultra Technology's radioactive materials license.

It may occur that the copy will not transmit legibly, therefore, we are mailing this material as a backup.

Yours very truly,

Ultra Technology Inc.

Attn: Mr. Duncan White:

Further to our telephone conversation regarding Ultra Technologys' radioactive materials license, we wish to inform you that we will surrender this license.

I am still in Utah, as I was during our telephone conversation this week. It appears we cannot conclude our business here before October 9, but at that time we will return to Calgary. I believe have the form there which is used to request an amendment. I will forward this document to you timely upon my return to Calgary.

License No. 50-23363-01
Control No. 571523

Donald S. Heiken
3836 Brighton Drive N.W.
Calgary, Alberta, Canada T2L 1G8

Subject: REQUEST FOR LICENSE AMENDMENT FOR STORAGE ONLY

Dear Mr. Heiken:

We have considered your request for a "Storage Only" amendment to your radioactive materials license including discussions of your request with NRC Headquarters. Based on our review, there appears to be three plausible options with regard to your radioactive materials license.

1. Obtain a suitable location for storage of radioactive materials where the materials would be under the control of individuals who are trained in handling radioactive materials and able to ensure the materials are kept secured and the public is protected. Once you have obtained a suitable location for storing radioactive materials we would grant an amendment for storage only. Prior to licensed material use, an additional amendment would be required.
2. Maintain your current license for use at temporary locations anywhere in the U.S. where the NRC maintains jurisdiction for regulating the use of licensed materials. This option would require that all fees be maintained at current levels unless you can satisfy the new criteria for small entities. Copy enclosed.
3. Terminate your present license and submit a new application when the opportunities for employment improve.

Please examine the options described above and provide us with further information regarding what course of action you prefer.

-2-

We will continue the review of your amendment request upon receipt of this information. In order to continue prompt review of your application, we request that you submit your response to this letter within 30 calendar days from the date of this letter. Please reply in duplicate and refer to Mail Control Number 571523.

Sincerely,

Robert J. Pate, Chief
Nuclear Materials and
Fuel Fabrication Branch

Suite 210
Walnut Creek, California

Attn: Mr. Kent Prendergast

Dear Mr. Prendergast:

In response to your telephone enquiry this afternoon concerning leak testing certificates and the disposal of our isotope projectors, please be advised as follows:

CTI Inc. of Ancorage shipped two Amersham Model 660 devices to Amersham in early 1991. Each device contained a source for disposal. The devices belonged to Ultra Technology, but not the sources, hence Amersham sent leak tests to CTI.

At a later date, Ultra Technology Inc. sold these devices to WesTest Inc., 8410 West Mercer Way, Mercer Island, Washington 98040. Amersham shipped the devices, loaded with new sources I assume. The device Serial Numbers are 4281 and 3224.

CTI shipped three empty 660 devices to me in Canada. I asked (by telephone) if they had been leak tested and was assured that they had been and since the sources had been transferred to CTI, I had no claim on the leak tests.

I received Serial Numbers 4850, 3433 and 3543 and subsequently sold S/Ns 3433 and 3543 to Rocky Mountain Inspection Ltd., 59 Woodvalley Mews S.W., Calgary, Alberta T2W 5N4. S/N 4850 is in storage in this company's source storage vault.

CTI shipped our 865 device containing a source to Amersham. After the source was removed I had it shipped to a premises I own in Utah where it is presently stored in locked storage. The device is in Amersham's shipping box and is marked

"OFFICIAL RECORD COPY" ML 10

properly. The manager at that location is aware of the contents and has been instructed as to the actions he should take in the event of a fire or theft.

You also required a U. S. address and contact person. Mr. Myrle Astrope will be our contact person. The address is:

Ultra Technology Inc.
c/o PAMI Inc.
145 South Geneva Road
Lindon, Utah 84042

With reference to License No. 50-23363-02 (neutron gages), this license needs to be terminated. Actually, it expired in September if I recall correctly. This mention is intended to bring the issue to your attention so you can reference previous correspondence to NRC on this matter.

Yours very truly,

Donald S. Heiken

1450 Maria Lane
Suite 210
Walnut Creek, California 94596

Gentlemen:

Our check for four hundred ninety dollars (\$490.00) and a form 313 requesting an amendment to the aforementioned license is enclosed.

Although we do not possess any form of radioactive materials other than isotope projectors we wish to modify our radioactive materials license to a "possession only" status. Ms. Marnella Rodriguez of the License Fee & Debt Collection Branch in Washington D. C. provided the information that an amendment requesting possession only status will allow us to hold the license without incurring the annual fees.

It is our intention to bid on the contract in Alaska where we used our radioactive materials license when the contract comes up for bid again in late 1992. If we are unsuccessful at that time it will be time to consider surrendering the license.

Yours very truly

Eunice M. Heiken
Ultra Technology Inc.
