RE: Request for termination of US NRC Materials  
License No. 13-15544-02

Dear Sir or Madam:

PSI Energy, Inc. requests that US Nuclear Regulatory  
Commission Materials License No. 13-15544-02 be terminated.  
All nuclear materials pertaining to this license have  
appropriately been disposed of or transferred to another  
license holder.

Should you have any questions concerning this request,  
please contact me at 317/838-1729.

Sincerely,

Michael A. Judd

Interoffice Memo

Date: 10.30.92  
Subject: NRC Materials License Termination  
From: Terry Ward /w  
To: Mike Judd  
Environmental Dept.

This memo is to confirm that as of 10-29-92 we have successfully transferred all equipment containing radioactive materials under license 13-15544-02 to other qualified owners.

The Nuclear Metal Analyzer was returned to TN Technologies, Inc. and replaced with a new metal analyzer under a general license. Tom McLarty is in charge of this new equipment.

One Troxler Density gauge was given to ATEC Testing, Inc. and the other was donated to Purdue University. See attached receipts for NRC License numbers.

All new owners have proper NRC Material Licenses to handle and operate this equipment.

Per our previous discussions PSI Energy Environmental Department can now properly terminate the NRC Materials License 13-15544-02 and notify the Indiana State Department of Health to terminate Certificate Registration Number R0217.

By copy of this letter we are notifying our Safety Department and all previous users of this equipment that Kay Hughes will be terminating the Radiation Dosimetry Badge service with Landauer Inc.

Please send confirmation of the license termination to my attention and advise if there are any further questions or comments.
