Pontiac, MI 48341

License No. 21-16742-02  
Docket No. 030-32685

Dear Mr. Predmore:

This refers to a telephone contact conducted on August 14, 1992. The purpose of the contact was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The contact consisted of discussions between yourself and Bill Radcliffe of my staff.

As a result of this examination of activities, a regulatory concern was noted and is specified below. This may be evaluated at an onsite inspection at your facility in the near future.

As described to you on the telephone, the following apparent regulatory concern was identified:

1. Failure to conduct physical inventories every 6 months as required by License Condition No. 15.

You should examine your license and NRC regulations to determine how you can correct the apparent regulatory concern that was discussed on the telephone. Please submit to this office, within 30 days of the date of this letter, a description of actions taken or those that will be taken to correct the above mentioned regulatory concerns. In addition, we would like to highlight the following items to which you, as a licensee, should pay particular attention:

- a. Maintaining awareness and control of licensed material.
- b. Properly transferring and disposing of radioactive sources.
- c. Promptly reporting losses or thefts of licensed materials.

If you have any questions regarding this inquiry, you may contact me at (708) 790-5620.

Sincerely,

*Gary V. Shear*  
Gary V. Shear, Chief  
Nuclear Materials Inspection  
Section 2

NOV 20 1992

cc: DCD/DCB (RIDS)

Per your request, a physical inventory was conducted on 8/14/92 and will be taken every six months.
