Docket Nos. 50-454, 455
Docket Nos. 50-373, 374
Docket Nos. 50-254, 265
Docket Nos. 50-295, 304

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

This refers to the special inspection conducted by Dr. M. J. Oestmann of this office on April 25, 1985, of activities at the Byron, LaSalle, Quad Cities, and Zion Nuclear Stations, Units 1 and 2, authorized by NRC Licenses Nos. NPF-23 and CPPR-131, NPF-11 and NPF-18, DPR-29 and DPR-30, DPR-39 and DPR-48, respectively, and to the discussion of our findings with Dr. J. Golden and other members of your staff at the conclusion of the inspection. The inspection was conducted at the Commonwealth Edison Company headquarters in Chicago, Illinois. Additional discussion was held with R. Dwyer on May 3, 1985.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection. However because of the number of items that were not ready to be closed, I have instructed my staff to repeat this inspection just prior to the end of the current SALP period.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC Public Document Room.
