SUBJECT: GENERIC LETTER 83-28, ITEM 1.2 - POST-TRIP REVIEW - DATA AND
INFORMATION CAPABILITY

We have completed our review of Post-Trip Review - Data and Information Capability for the Fort Calhoun Station, Unit No. 1. Our review was based on your November 4, 1983 response to our July 8, 1983 Generic Letter entitled "Required Actions Based on Generic Implications of Salem ATWS Events". As you know, we forwarded to you our draft Technical Evaluation Report on May 7, 1985 as prepared by our contractor, Science Applications International Corporation. We also had a telephone conference on May 28, 1985 which focused on two incomplete areas. Based on our review of your November 4, 1983 submittal and the telephone conference which was conducted on May 28, 1985 we have concluded that the post-trip review data and information capability for Fort Calhoun Station, Unit No. 1 is acceptable.

Our Safety Evaluation is enclosed.

Sincerely,

Original signed by:

Edward J. Butcher, Acting Chief
Operating Reactors Branch #3
Division of Licensing

Enclosure:

As stated
