

Refueling Information
Fort Calhoun - Unit No. 1

Report for the month ending March, 1985.

1. Scheduled date for next refueling shutdown. October, 1985
2. Scheduled date for restart following refueling. December, 1985
3. Will refueling or resumption of operation thereafter require a technical specification change or other license amendment? Yes
 - a. If answer is yes, what, in general, will these be?

Technical Specification change to accommodate increased radial peaks due to further reduction in radial leakage.
 - b. If answer is no, has the reload fuel design and core configuration been reviewed by your Plant Safety Review Committee to determine whether any unreviewed safety questions are associated with the core reload. _____
 - c. If no such review has taken place, when is it scheduled? _____
4. Scheduled date(s) for submitting proposed licensing action and support information. September, 1985
5. Important licensing considerations associated with refueling, e.g., new or different fuel design or supplier, unreviewed design or performance analysis methods, significant changes in fuel design, new operating procedures.

Methodology Changes

June, 1985

6. The number of fuel assemblies:

a) in the core	133	assemblies
b) in the spent fuel pool	305	"
c) spent fuel pool storage capacity	729	"
d) planned spent fuel pool storage capacity	May be increased via fuel pin consolidation	"
7. The projected date of the last refueling that can be discharged to the spent fuel pool assuming the present licensed capacity. 1996
