Harold R. Denton, Director, Division of Site Safety and Environmental Analysis (DSE)

TECHNICAL ASSISTANCE REQUEST NO. 1599-1, SUPPLEMENT NO. 1

Your assistance is requested in the following:

PLANT NAME: See Enclosure

DOCKETS NOS.: See Enclosure

RESPONSIBLE BRANCH: Operating Reactors Branch #3 (ORB3)

CONTACTS: 1st: T. Verdery (Extension 27072)

Individuals: Appropriate ORB-FM listed in the Enclosure

DSE BRANCHES: Effluent Treatment Systems Branch (ETSB), Radiological Assessment Branch (RAB), and Hydrology-Meteorology Branch (HMB)

TARGET COMPLETION DATE: December 1, 1977(T)

DESCRIPTION OF REQUEST: Background

This TAR has been prepared as a supplement to the Generic TAR No. 1599-1 for Appendix I to 10 CFR Part 50 and is in lieu of individual TAR's for all facilities listed in the enclosure.

#### Request

We request your review and preparation of a written evaluation of licensee "Appendix I submittals" for all facilities listed in the enclosure. Your evaluation should determine whether each facility is in full compliance with Appendix I, including the cost benefit assessment and proposed Technical Specifications which implement Appendix I, 10 CFR Part 50.

It is expected that the development by the staff of final model Technical Specifications for implementation of Appendix I will not be completed until early fall of 1976. Your efforts in evaluating the licensees proposed Technical Specifications should be deferred until the licensees have submitted the proposed Technical Specifications based on the final model.

#### DISTRIBUTION:

Dockets  
ORB#3 Rdg

9212040357 760619

JUN 1 5 1976

The Mail and Records section has been requested to distribute 3 copies of all Appendix I submittals and related correspondence to J. T. Collins of ITSB. Specific problems with obtaining the necessary copies of each submittal or associated information should be addressed to the cognizant OM-FM listed in the enclosure.

### Schedule

The establishment of a priority list and review schedule for the facilities assigned to the Division of Operating Reactors is a significant outstanding item that must be completed as soon as practicable after the "acceptance" reviews are completed.

Victor Stello, Jr., Director  
Division of Operating Reactors  
Office of Nuclear Reactor Regulation
