### FREEDOM OF INFORMATION REQUEST

On June 2, EDO James M. Taylor presented to the commissioners a list of 13 licensees who have submitted requests for license amendments and new licenses to store Low-Level Radioactive Waste (LLRW) over the past year. A copy of the list of licensees, their license numbers, and the covering title page (SECY-92-202) is appended here.

I have been unable to find any of these requests in the NRC's Public Document Room, and though the PDR staff was able to trace some amendment activity in earlier years, a staff search has also failed to turn up any copies of the past year's requests.

Therefore, in accordance with 5 U. S. C. 552(a)(4)(iii) governing FOIA requests and fee waivers, I am requesting copies of all of the past year's requests by materials licensees for license amendments and new licenses to store LLRW, including but not limited to those in the SECY document. It is my expectation that this request can be filled within the two-hour search limit and the 100-page copying limit, and therefore I assume fee waiver.

*Atoms & Waste* is the monthly publication of Don't Waste U.S., a 501(c)(3) not-for-profit corporation dedicated to facilitating public participation on nuclear waste issues. We communicate regularly to approximately 2,000 readers in all fifty states and through international networks overseas.

With thanks in advance for your help in this matter,

Kemp Houck
