

W. Regan

September 20, 1974

Note to Dr. Spangler:

As we discussed on Thursday, September 12, the Staff will need a witness in the Monticello proceedings from your branch to treat the question of the effect of conservation of energy as on the need for the Monticello plant. A similar issue was raised in the Prairie Island proceeding in which the same utility was analyzed with the Monticello plant then operating. We would need your written testimony by about September 25, 1974. Thank you for your kind assistance.

Joe Sante
