Re: License Amendment
37-17717-02

Dear Mr. Glenn:

Your office is currently in the process of reviewing a request for a license amendment as per our July 20, 1982 correspondence. During a phone conversation with a member of your staff during the week of August 29, 1982 we indicated that additional amendments were required regarding our license. We were informed that our current amendment requests could be included as an addition to the amendment request of July 20, 1982.

Therefore, in addition to the information supplied in our letter of July 20, 1982 we request that the name of John LaPorta be added to our list of nuclear gauge operators. Mr. LaPorta is receiving personal instruction by one of our instructors regarding the safe use of our firms nuclear gauges. Mr. LaPorta is currently receiving on the job training under the direction of one of our licensed operators. We also request that our license be amended to include the planned acquisition of additional nuclear gauge equipment. Please amend our license to include the use of Troxler Models 1351 and 1352 Depth Density Gauges.

We appreciate your assistance regarding this matter. If you have any questions, please feel free to contact our office.

Sincerely,

8505280455 850513
