Docket Nos. 50-254; 50-265
License Nos. DPR-29; DPR-30

Commonwealth Edison Company
ATTN: Mr. L. O. DelGeorge
Vice President, Nuclear Oversight
and Regulatory Services
Executive Towers West III
1400 Opus Place, Suite 300
Downers Grove, IL 60515

Dear Mr. DelGeorge:

This refers to the inspection conducted by Messrs. T. Taylor, J. Shine, P. Prescott, G. Hausman, and Ms. P. Loughheed of this office from November 23, 1992, through January 11, 1993. This inspection included a review of authorized activities for your Quad Cities Nuclear Power Station facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of a selective examination of procedures and representative records, interviews with personnel, and observation of activities in progress.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The first violation is of concern because it involved your failure to provide prompt resolution of a previous violation, which in itself, concerned the failure to adequately identify and promptly resolve a 1/2 diesel generator logic issue.

Also during this inspection, certain other of your activities appeared to be in violation of NRC requirements. However, as described in the enclosed inspection report, you identified the violation, therefore, it is not being cited because the criteria specified in Section VII.B.2 of 10 CFR Part 2, Appendix C (Enforcement Policy) were met.

Additionally, two events occurred involving the temporary cooling water to the instrument air system. We are concerned about your administrative controls over balance-of-plant activities which could impact plant operations. In addition to addressing the above violations, we request that your response also address your planned actions to ensure adequate control over balance-of-plant activities which could affect plant operations.

2

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. In the case of the first violation, your response should address not only how the initial concern will be resolved, but also how you will ensure that corrective actions are promptly taken on future issues. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying inspection report are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,
