The Commission has issued the enclosed Amendment No. 99 to Facility Operating License No. DPR-65 for Millstone Nuclear Power Station, Unit No. 2, in response to your application dated February 6, 1985 as supplemented June 5 and June 11, 1985.

These revisions to the Technical Specifications modify the allowable region of operation when the core power distribution is monitored by the Excore Detector Monitoring System. These revisions reflect changes in Cycle 7 operating characteristics and allow operation in fuel Cycle 7.

A copy of our Safety Evaluation is also enclosed. The notice of issuance will be included in the Commission's next biweekly Federal Register notice.

Sincerely,

/S/

D. B. Osborne, Project Manager  
Operating Reactors Branch #3  
Division of Licensing

Enclosures:

1. Amendment No. 99 to DPR-65
