Action Compl	11/5/84

We are requesting that our Byproduct Material License No. 37-15350-01 be renewed with the following changes:

1. On the facility diagram the inpatient waiting room has been converted to a camera room. It will be routinely monitored to assure that proper exposure and contamination controls are in effect.
2. The lounge area and other immediately adjacent dressing and toilet rooms have been converted to file rooms.
3. The following gamma cameras are now in use:

Manufacturer	Model #	Serial #
a. Technicare Portable	420/550	531
b. Technicare LFOV	438/560	132
c. Siemen's LFOV	3132	33580

4. The Picker Model 436 GM probe has been taken out of routine use. The primary survey instrument will remain the Victoreen Model 498 GM meter.
5. Mo-99/Tc-99m generators will be held for decay, surveyed, stripped, labels removed and disposed or will be returned to the manufacturer.
6. When necessary, solid waste will be transferred to a commercial waste service. The service will be selected on the basis of our immediate needs and on the condition of having a current NRC license to handle radioactive waste.

No other changes in the license are being requested at this time. A check for \$580.00 is enclosed in accordance with 10CFR170.
