THRU: G. Fiorelli, Chief, Reactor Operations and Nuclear Support Branch

NORTHERN STATES POWER COMPANY (MONTICELLO AND PRAIRIE ISLAND 1 AND 2)
DOCKET NOS. 50-263, 50-282 AND 50-306
REQUEST FOR EXEMPTION OF DISCLOSURE FOR RESPONSE TO IEB 75-04B

We are forwarding the enclosed responses to IE Bulletin 75-04B from Northern States Power for technical review in keeping with the bulletin request. In addition, please evaluate the enclosures to the licensee's letters for the two facilities for material which should be exempted from disclosure under the provisions of Title 10, Section 2.790. Since the material is similar to that transmitted by Wisconsin Public Service, which we forwarded for evaluation by memorandum dated December 9, 1975, your finding regarding Wisconsin Public Service can be applied to the Northern States Power request.

The specific request for exemption was received by telecon from Mr. G. Neils of Northern States Power to myself on November 11, 1975, during an attempt to clarify the licensee's intent as stated in paragraph two of his transmittal letters dated December 5, 1975.

We will hold distribution of the enclosures to this bulletin response pending your evaluation.

E. L. Jordan
Section Leader
Reactor Projects No. 2
