

DEC 02 1992

Docket No. 50-322

Mr. Leslie M. Hill
Shoreham, Resident Manager
Long Island Power Authority
Shoreham Nuclear Power Station
P.O. Box 628, North Country Road
Wading River, New York 11792

Dear Mr. Hill:

SUBJECT: INSPECTION REPORT NO. 50-322/92-04

This letter transmits the results of safety inspections conducted by Mr. B. S. Norris, and others, from June 27, 1992, through October 12, 1992, at the Shoreham Nuclear Power Station, Wading River, New York. The inspectors focused their efforts on issues important to safety, and based their findings on observation of activities, interviews, and document reviews. The inspection results were discussed with yourself and members of your staff.

Based upon the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation, failing to provide complete and accurate information to the NRC relative to the Decommissioning Plan, is of concern because it represents a weakness in your understanding of the required communications with the Commission. You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions already taken and any additional actions you plan to prevent recurrence.

We noted that your programs relating to radiological controls and fire protection were well implemented. However, an unresolved item was identified regarding the sign-off of activities associated with a shipment of irradiated control rod blades in advance of performing the required activities.

In accordance with 10 CFR 2.790(a), a copy of this letter and enclosure will be placed in the Public Document Room. The response directed by this letter and the enclosed Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL No. 96.511.
