Docket No. 50-295

Docket No. 50-304

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Senior Vice President
Opus West III
1400 Opus Place - Suite 300
Downers Grove, IL 60515

Dear Mr. Reed:

This refers to the routine safety inspection conducted by J. D. Smith, R. J. Leemon, A. M. Stone, R. B. Landsman, D. E. Jones and J. Walker of this office from September 29 through November 9, 1992. The inspection included a review of activities authorized for your Zion Nuclear Generating Station. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedure and representative records, observations, and interviews with personnel.

As described in the enclosed inspection report, you identified a violation, and to encourage and support licensee initiatives for self-identification and correction of violations, the violation is not being cited because the criteria specified in Section V.G. of the "General Statement of Policy and Procedure for NRC Enforcement Actions" (Enforcement Policy, 10 CFR 2, Appendix C, (1992), were satisfied. The inspection showed that actions had been taken to correct the identified violation and to prevent recurrence. Our understanding of your corrective action is described in your Licensee Event Report. Consequently, no reply to this violation is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
