ATTN: Chris Shlagor, Vice President
Laboratory Operations
4444 Giddings Road
Auburn Hills, MI 48326

License No. 21-20044-01
Docket No. 030-17681

Dear Ms. Shlagor:

This refers to the routine safety inspection conducted by Mr. S. J. Mulay of this office on January 11, 1993, of activities authorized by NRC Byproduct Material License No. 21-20044-01, and to the discussion of our findings with Dr. E. Dvorin and other staff members at the conclusion of the inspection and via telephone on January 22, 1993.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated March 31, 1987, regarding violations found during our March 9 and 17, 1987 inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities were found to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

IE07,11

JAN 29 1993

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Gary L. Shear, Chief
Nuclear Materials Inspection
