Sheridan, Wyoming 82801

RE: Progress Report, Well Abandonment, ND Resources,
Project Site

Dear Mr. Ruyle:

This letter, pursuant to our letter to you on March 14, 1985, is to inform you that ND Resources has completed the approved procedures in abandoning the wells at its Oshoto in-situ uranium mining test site in Crook County, Wyoming.

As of March 14, 1985, the only work remaining to be done was the seeding around the 15 wells in the "Five Spot" field. That seeding was completed on the 12th and 13th of April, 1985.

ND Resources feels that its well abandonment procedures are in full and complete compliance with the applicable rules of Chapter 11, Part G, Section 70 of the WDEQ/WQD.

Thank you.
