2.) Operating procedures

A. Transportation of equipment

1. All possible means shall be provided to ensure that the equipment is fully secured in the transporting vehicle and the equipment is away from the passenger compartment. When transporting in an enclosed vehicle (car or van), the vehicle will be locked. When transporting in an open bed vehicle, the gauge should be securely fastened and locked to the truck bed.
2. The gauge will be transported in the Troxler transportation case. The U.S. Department of Transportation requires that the gauge be transported in a properly labeled carrying case.

B. Utilization procedures

1. When the gauge is in the field, we as the authorized user must maintain control over the gauge at all times. The gauge will never be left unattended.
2. When not making measurements, the gauge will be placed in the transportation case and returned to its permanent storage area as soon as possible. The gauge is to be used for its intended purpose only. By doing so, we will maintain any radiation exposure to as low as reasonably attainable.
3. When using the equipment, we will wear the personnel monitoring device that has been assigned to us. When we are not using the equipment, our monitoring device is to be stored in the radiation free area that has been designated in the office. The film Badge company will be R.S. Landauer, Glenwood, Illinois and the badges will be exchanged quarterly with reports on both gamma & neutron radiation kept on file. The badge type is a BI.
4. a utilization log book will be kept to control the gauges whereabouts at all times. It will be signed out and in with operators name.

C. Maintenance and leak test procedure

1. Periodic maintenance will include cleaning the gauge. During any maintenance, we will wear our personnel monitoring device. If the source rod is removed for cleaning purposes, it will be placed in a lead pig or at least twenty feet away from anyone.
