Donald A. Cool, Ph.D.
U. S. Nuclear Regulatory Commission
Division of Fuel Cycle and
Material Safety, NMSS
Washington, D. C. 20555

Dear Dr. Cool:

Reference: U. S. NRC License No. STB-401

The purpose of this letter is to request an extension of the environmental review and radiation safety evaluation review schedules. Conflicting priorities have prompted us to defer the previous schedules for one month.

Environmental impact review
Radiation safety evaluation

July 1, 1985
August 1, 1985

This revised schedule should provide us sufficient time to prepare the additional information needed for you to continue review of our application for renewal of the above-referenced license.

Thank you for your cooperation in this matter.

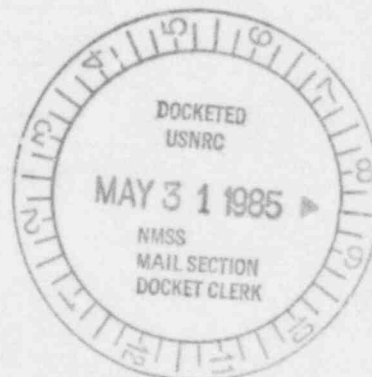

Sincerely,

MALLINCKRODT, INC.
