ILLINOIS POWER COMPANY  
Clinton Power Station  
PERFORMANCE DATA

No Reportable Events occurred during the July - December 1992 reporting period.

-----

MANAGEMENT ACTIONS

Clinton Power Station continues its observance of the procedures and protocols for onsite laboratory testing for alcohol and illegal drugs conforming to 10CFR26 requirements.

November 9 - 20, 1992 our Quality Assurance department conducted an audit to evaluate the implementation and effectiveness of the Fitness for Duty (FFD) Program at Clinton Power Station (CPS). This audit resulted in no findings. Recommendations were made for program enhancements which are to be implemented by June 1, 1993.

-----

\* Clinton Power Station tests all site employees with and without unescorted access privileges. The numbers given reflect all those individuals in the random selection program.

\*\* Numbers given reflect testing of those individuals placed on a monitoring program per the Medical Review Officer's (M.R.O.) recommendation due to background information and personal interviews by the M.R.O. These are unannounced tests, and individuals are escorted from their jobs to the collection site for testing. Also included in these number are those tests which were repeated because of low specific gravity or low creatinine results on the initial test result.
