File No. G9.5

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

River Bend Station - Unit 1
Docket No. 50-458

Enclosed for your review is the Gulf States Utilities Company (GSU) Program Plan for the Transamerica Delaval, Inc. (TDI) Standby Diesel Generators, Revision 1. This letter supplements the letter from J. E. Booker to H. R. Denton dated December 21, 1984 (GSU Letter No. RBG-19762) and generally consists of an update to the original plan and incorporation by reference of various submittals to the NRC staff since the original plan, while the general content and scope of the program plan has not changed. Finally, work is currently ongoing at River Bend Station (RBS) to complete the remaining post-test inspections for the TDI diesel generators. These post-test inspections are to be completed during the month of May, 1985 and when finished, this program plan will be supplemented with their results.

Sincerely,

J. E. Booker
