Re: Byproduct Material License No. 15-21331-01

Gentlemen:

We have responded to the Notice of Violation dated January 8, 1993, (NRC Inspection report No. 030-20528/92-01) as instructed in your letter of the same date. This response was sent under separate cover. Your letter mentioned the anticipated reorganization of Davis Great Guns Logging, Inc. and enclosed a copy of NRC Information Notice No. 89-25 "Unauthorized Transfer of Ownership or Control of Licensed Activities".

In Keith Moon's letter to Mr. Leonard dated December 15, 1992, which was stipulated to be kept from public record, he explained the transfer of stock and possible changes in management which were anticipated. Please be advised that at this time not all of the specifics for reorganization have been determined, however, you may be assured that DGGL has experienced, qualified and knowledgeable personnel in place to ensure the integrity of our radiation safety program. Although Gary Davis has resigned as President, he is still available in a consulting capacity. Our new President is Nyron Deverdish and he is responsible for general operations and management oversight. There have been no other significant changes in personnel or management. An amendment request will be submitted for any changes that will affect our license, i.e. change of location, change of RSO.

Sincerely,

Roger Taylor  
Corp. Radiation Safety Officer
