

Office Memorandum • UNITED STATES GOVERNMENT

TO : Inspection Division File

DATE: May 16, 1958

FROM : Eugene J. Moretti, Radiation Engineer *ju*
Inspection DivisionSUBJECT: LINDSAY CHEMICAL CO. - REPORT OF ACCIDENT NOT INVOLVING A
RADIATION HAZARD

SYMBOL: ID:DAO

Mr. Howard Kremers, Technical Assistant to the President, Lindsay Chemical Company, phoned the COO Inspection Division today and talked to T. W. Brockett and myself.

Mr. Kremers stated that, during the process of loading monazite ore, a pile of bags fell over hitting two employees. The employees have incurred back injuries through this accident, although there was no work stoppage.

Since there was no radiation involved nor licensed material, this occurrence is outside the field of interest of the COO Inspection Division.
