Docket No. _____

PDR ☒

LPDR _____

Distribution: _____

Dear Mr. Themelis:

(Return to WM, 623-SS)

We have reviewed the Radiological and Engineering Assessments (REAs) dated April 4 and 12 and May 8, 1985 for the vicinity properties in Salt Lake City, Utah at 4856 South Glenn Street (SL-001), 155.5 West 3300 South Street (SL-023), 1444 East 3300 South Street (SL-021), and 2980 South 2700 East Street (SL-017). We concur with the remedial actions recommended in these REAs. This concurrence is based on the following conditions:

1. We have concurred in the current version of the VPMIM;
2. The recommended action in each REA involves less than 10,000 cubic yards of contaminated material and is intended to meet the primary EPA standards; and
3. The removed contamination will be placed in the Vitro site tailings in South Salt Lake. Final disposal will be with the Vitro site tailings at the Clive disposal site.

Please notify us immediately of any action or decision which may affect any of these conditions.

If you should have any questions on this or any other vicinity property remedial action concurrence, please contact Dennis Sollenberger of my staff at (FTS) 427-4783.

Sincerely,

Original signed by

Leo B. Higginbotham
