MEMORANDUM FOR: Karl Kniel, Chief
Generic Issues Branch, DST

FROM: Felix Litton, Task Manager
Generic Issues Branch, DST

SUBJECT: PLANT ANALYSIS REPORT - USIA-45 "SHUTDOWN DECAY HEAT
REMOVAL REQUIREMENTS

We have requested Sandia National Laboratories to provide a copy of the draft report to the respective utility prepared as part of the analyses conducted for the USI A-45, "Shutdown Decay Heat Removal Requirements" program. Review of the report by the utility is necessary to confirm the accuracy of the plant model used in the analysis.

Pursuant to procedures outlined in NRR Office Letter No. 43, we are placing this memorandum with the draft report (except for Appendix I, containing Safeguard Information) in the Public Document Room.
