

JAN 28 1993

Mr. R. Howard Smith, Director
Corporate Quality Assurance
Pacific Nuclear
1010 South 336th Street
Federal Way, WA 98003

Dear Mr. Smith:

SUBJECT: REVISION OF PACIFIC NUCLEAR SYSTEMS, INC. QUALITY ASSURANCE MANUAL

Your letters of November 23 and December 18, 1992, transmitted Revision 3 of Edition 2 of the Pacific Nuclear Systems, Inc. (PNSI) Quality Assurance (QA) Manual. The revision reflects discontinued use of subsidiary names and the use of group names instead; realigning the group QA Manager reporting line from the Director, Corporate QA, to the executive group management; changing "customer" to "client"; and making additional minor changes to update and clarify the manual.

We have compared Revision 3, Edition 2 of the manual with Revision 2, Edition 2, which we reported as acceptable in our letter to you dated March 26, 1992. We find that Revision 3 continues to describe an acceptable QA program for the design and manufacture of systems for long-term interim storage of irradiated nuclear fuel assemblies. That is, when properly implemented, the QA program described in the manual will meet the requirements of Subpart G of 10 CFR Part 72.

Should you have any questions regarding our review, please contact Jack Spraul on (301) 504-2446.

Sincerely,

15/
Charles J. Haughney, Chief
Source Containment and
Devices Branch
Division of Industrial and
Medical Nuclear Safety
Office of Nuclear Material Safety
and Safeguards
