UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

May 13, 1985

The Honorable Tom Beville, Chairman  
Subcommittee on Energy and Water Development  
Committee on Appropriations  
United States House of Representatives  
Washington, D.C. 20515

Dear Mr. Chairman:

Since its creation 10 years ago, the Nuclear Regulatory Commission's headquarters staff has been housed in facilities widely dispersed in the Washington, D.C. area. At the present time, the Commission's 2,457 headquarters employees are located in 11 different buildings in downtown Washington and in Silver Spring, Rockville and Bethesda, Maryland. The Commission believes this situation makes it difficult to carry out its mission in the most effective manner. Consequently, consolidation continues to be a major objective of the agency.

For the first time in several years it appears that consolidation of the NRC can be achieved. On February 15 the General Services Administration submitted to the Congress a prospectus to authorize NRC's consolidation in a newly leased facility. On April 15, GSA, with the concurrence of NRC, issued a Solicitation for Offers for property owners to provide space for this purpose. The proposal provides for consolidation in far northwest Washington or in Bethesda, in the vicinity of the Tenleytown, Friendship Heights or Bethesda Metro subway stations. All five members of the Commission are in agreement on consolidating in this area. Downtown Washington is not under consideration in this solicitation. Responses to the solicitation are to be received by June 5.

The relevant congressional committees--House Public Works and Transportation and Senate Environment and Public Works--have the GSA prospectus under consideration. Favorable action will be a major step forward and will greatly enhance the possibility that NRC consolidation can be assured before the end of this year.

Knowing of your interest in the operation of NRC, we would be pleased to provide you with any additional information you might require on consolidation.

Sincerely,

Nunzio J. Palladino  
Chairman
