: LOADED WEAPON FOUND DURING ENTRY SEARCH

Approximately 7:15 a.m. (EDT) on July 2, 1985, licensee security personnel discovered a handgun (clip loaded, but with no round in the chamber) in a briefcase carried by a hired Toledo Edison management employee. He has worked at the site for approximately 10 months but has worked in the nuclear industry since retiring from the U.S. Navy as a Lieutenant Commander nine years ago. The weapon was discovered during a routine x-ray search as the individual entered the personnel process facility. The weapon was immediately confiscated by security personnel.

At that time, a security supervisor interviewed the individual and determined that the individual posed no threat to the facility and he was allowed onsite. The individual's supervisor and the plant superintendent were informed of the incident. He indicated that he retained the weapon for self-protection at his residence and had forgotten to retrieve it from his briefcase.

The licensee is in the process of further interviewing the individual. Until the investigation is completed, the individual will not be allowed access to the site.

The licensee has contacted the County Sheriff.

The FBI (Chicago) is monitoring the licensee's investigation of the incident.

The licensee was notified of this incident at 10:50 a.m., July 2, 1985 by the Headquarters Officer. The Information Assessment Team, NMSS has been notified.

This information is current as of 1:45 p.m. (CDT), July 2, 1985. The State of Ohio will be kept advised.
