December 19, 1961

RESUMPTION OF THORIUM OPERATIONS - AMERICAN POTASH AND CHEMICAL
CORP., WEST CHICAGO, ILLINOIS - LICENSE NO. R-234

CO-CH: JAF/RMJ

On December 19, 1961 Dr. R. M. Healy, Radiological Safety Officer, Lindsay Chemical Company, West Chicago, Illinois, License No. R-234, informed this office that limited thorium separation operations have been resumed and that full-scale operations are anticipated within the next thirty days.

Our records reveal that the Division of Licensing and Regulation has not completed enforcement action with respect to the inspection of June 1961.

In the inspection report transmitted by memorandum dated July 21, 1961, certain questions arose which Licensing and Regulation was asked to clarify. These questions have a direct bearing on any future inspections.

We will conduct a reinspection at the completion of enforcement action.
