Dear Mr. Salmon:

Subject: Inspection Number 50-333/93-01

This letter refers to the safety inspection conducted by Dr. Jason C. Jang of this office on January 25-29, 1993, of activities authorized by NRC License No. DPR-59 at the James A. FitzPatrick Nuclear Power Plant, Lycoming, New York and to the discussion of our findings held by Dr. Jang with you and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection included your radioactive liquid and gaseous effluent control programs as described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation by the inspector.

Within the scope of this inspection, we noted that you had excellent programs for radioactive liquid and gaseous effluent control, with the capabilities to protect the public health and safety and the environment. We noted further that the responsible individuals in the Chemistry Department had excellent knowledge to implement the above programs. No safety concerns or violations of regulatory requirements were observed in your programs.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
