

FEB 5 1993

Docket No. 50-293

Dr. E. Thomas Boulette
Acting Senior Vice President-Nuclear
Pilgrim Nuclear Power Station
Boston Edison Company
RFD #1 Rocky Hill Road
Plymouth, Massachusetts 02360

Dear Dr. Boulette:

SUBJECT: INSPECTION REPORT NO. 50-293/93-01 (EMERGENCY OPERATING
PROCEDURE INSPECTION)

This letter transmits the report of a safety inspection of your facility's emergency operating procedures lead by Mr. Carl Sisco from January 11 to January 14, 1993, at the Pilgrim Nuclear Power Station. The inspection activities are authorized by NRC License No. DPR-35. Discussions of our findings were held between our staffs at the conclusion of the inspection.

The inspection is a selective review for adequacy of your facility's emergency operating procedures (EOPs) and supporting development documentation, implementing procedures, and training. This area is important to safety because it assures the continued implementation of generic guidance for the evaluation and development of procedures used to mitigate the effects of transients and accidents.

The inspection concluded that your EOPs are generally technically adequate and the operating staff understands how to use them. Section 3 of the report addressed two unresolved items dealing with the timely notification of the plant operating staff of significant plant problems and with the level of review and approval of EOP support procedures being different than that of the EOPs.
