Director of Nuclear Reactor Regulation
Attention: Mr. D. B. Vassallo, Chief
Operating Reactors Branch No. 2
Division of Licensing
United States Nuclear Regulatory Commission
Washington, DC 20555

BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2
DOCKET NOS. 50-325 & 50-324/LICENSE NOS. DPR-71 & DPR-62
CONTROL ROOM HABITABILITY

Dear Mr. Vassallo:

On May 29, 1985, a meeting was held with members of your staff to discuss Control Room Habitability at Brunswick. By letter dated June 7, 1985, your staff provided Carolina Power & Light Company with a summary of this meeting. In addition, this letter requested a schedule for submittal of a dose calculation based on the extrapolated flow rates required to achieve the 1/8-inch positive pressure in the Control Room and a schedule for submittal of the Technical Specifications regarding quantification of the control room pressure requirements. As stated in our letter of June 14, 1985, we expect to have results of the dose calculation available for your review by September 2, 1985. A license amendment request quantifying the control room pressure requirements will be made within 45 days of our dose calculation submittal.

Please refer further questions concerning this matter to Mr. Richard J. Fasnacht at (919) 836-7318.

Yours very truly,

S. R. Zimmerman
Manager
