Chief, Nuclear Materials Section  
Licensing Branch  
Division of Licensing and Regulation  
U. S. Atomic Energy Commission  
Washington 25, D. C.

Dear Mr. Delaney:

Our present Source Material License No. C-4960, amendment No. 2, expires October 31, 1960. When this last license was granted, you stated that, upon review of our submitted report on radiological surveys of operations at Parkersburg, we would be advised with regard to the issuance of our license for the usual one-year period. In the ensuing ten-week period, we have not heard regarding such action. If you feel that there is any further action necessary on our part, please so advise.

We would of course prefer a one-year license; if for any reason this is not possible, please extend the present license for whatever period you deem practical.

Very truly yours,

THE CARBORUNDUM METALS COMPANY
