Atlanta, Georgia 30303

re: Renewal of License
no. 45-03499-07

Dear Ms. Connell:

We have recently been notified that our current license (i.e. NRC License No. 45-03499-07) which provides for the authorization of operation of a 420 curie cesium-137 irradiator will expire 3/31/85.

Except for two proposed amendments, the current license and its associated documents accurately reflect our current and projected use of the subject irradiator. We, therefore, request renewal of NRC License No. 45-03499-07 based on the conditions and requirements stated in our current license and including the following two proposed amendments.

Proposed Amendment #1: Item 6 should have the name of Henry Aceto, Jr., Professor of Biology added.

Proposed Amendment #2: Item 10 should have Line No. 2 changed from "Survey Meter, Lionel Corp., etc." to read:

Type	Manufacturer	Model	Number Available	Radiation Detected	Sensitivity Range
Survey Meter	Nuclear-Chicago	2650	1	beta-gamma	.01-100 mr/hr

Thank you for your consideration of this matter.

Sincerely,

Henry Aceto, Jr.
Henry Aceto, Jr.
Professor of Biology
Chairman, Campus
Radioisotopes Committee
