Communication #53

Mr. Fred Ross
Division of Waste Management
Mail Stop 623-SS
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Fred:

I have enclosed a copy of the requested article by Delhomme entitled "Spatial Variability and Uncertainty in Groundwater Flow Parameters: A Geostatistical Approach". This article contains some very useful information.

I received the latest copy of Water Resources Research yesterday. This issue includes an article by Orr and Kreitler entitled "Interpretation of Pressure-Depth Data From Confined Underpressured Aquifers Exemplified by the Deep-Basin Brine Aquifer, Palo Duro Basin, Texas". I have not read this article yet but I suspect that we will see it referenced in future DOE documents.

Sincerely,

Gerry
