Re: Request for amendment of license #37-08784-0)

Gentlemen:

We are requesting amendment of condition 14A to allow wipe tests to be performed once every 3 years instead of every 6 months. Tracor Instruments has notified us that all of their Ni 63 electron capture detectors now require wipe testing only once every three years.

A copy of Tracor's notice is enclosed.

If you need any further information, please feel free to call me.

Sincerely,

*Joseph J. Strug, Jr.*  
Joseph J. Strug, Jr.

Effective November 7, 1983, all Tracor Ni63 electron capture detectors will require wipe testing only once every three years (36 months). In order to take advantage of this new interval, your specific license must be amended to show testing every 36 months. You may find your state or jurisdiction will require more frequent testing.

This extended interval is covered under Amendment 23 of our Specific License 6-1186 and Amendment 1 of our General License 6-3389GL.

Should you have any additional questions or require assistance with this new benefit, please contact our Radiation Officer, Mr. Carlton Lorfing, at (512) 926-2800, Ext. 5013.

/ve

Amended on April 24, 1984, per The State of Texas.
