MEMORANDUM FOR: William E. Cline, Chief
Emergency Preparedness Section

FROM: William M. Sartor, Jr., Radiation Specialist
Emergency Preparedness Section

SUBJECT: EMERGENCY PLAN REVIEW - SURRY POWER STATION
EMERGENCY PLAN, REVISION DATED FEBRUARY 14, 1985

The Virginia Electric and Power Company submitted a revision dated February 14, 1985, to the Surry Power Station Emergency Plan. This superseded five (5) pages were not available for review, however, an examination of the new pages indicated the planning standards of NUREG-0654 would not be degraded due to the revised pages. Specifically, the new pages addressed: (1) initiating conditions for Notification of Unusual Event, (2) index of Radiological Monitoring and Dose Assessment Procedures, and (3) an updated Letter of Agreement.

Based on this review, the planning standards of NUREG-0654 appear to continue to be met.

William M. Sartor, Jr.
